- [Object Oriented Programming With Java Training Set](#)
- Android Training Set [1](#) - [2](#)

## Freelance Projets

---

- [Mobil Plasiyer Android Application](#)
- [Becel Kalbini Sev Application](#)
- [Türk Para Kataloğu](#)
- SMS to Mail Android Application
- Patient survey application for hospitals
- [Swansy](#)
- [Servisyon](#)
- [Kontör Yükleme Sistemi](#)
- [Eksperium](#)

## Technical Knowlegde

---

I worked on java back-end, hibrit and IOS applications. But recently I am Android Developer. I use Java/Kotlin and Android Studio for that.

In companies that I have worked and for my personal projects, I use git as a version control system.

Some sdks and apis that I've experienced; Dagger , Parse, Fabric, Google Map, Google Places, Admob, Facebook, Picasso, Volley, Gson, Flicker Api, Google In-App Purchase, In-App Update, In-App Review, Google Drive Api, Retrofit, Room, Realm, Firebase...

I use mvp and interactions design pattern with dagger for building application.

I develop sdks initially for my own use, you can find them under my github [link](#).

Furthermore about coding, I also know and efficiently use web tools and systems like; jira , trello, source tree, zeplin, figma, confluence...

## Foreign Languages

---

- **English:** Reading, Writing good - Speaking medium.
- **German:** C1
- **Russian:** A2
- **Polish:** A1

## Courses

---

- **German Course** / EBA / 950 hours / 2009
- **Java and Android Course** / Bilgeadam / 300 hours / 2013
- **IOS Course** / Kadir Has / 30 hours / 2015

## Certificates

---

- UniCertificate Web Designing- Dreamweaver - 07.05.2012
- UniCertificate E-Commerce - 07.05.2012
